Portal for secure data exchange in mobile communications

Digitalization of the process coordination of participating companies in telecommunications

Future-oriented use of the PreHCM portal through modular scalability

Looking for a reliable platform that revolutionizes secure data exchange in the mobile sector?

Welcome to PreHCM Portal, your key partner for the digitalization of process coordination between participating companies in the telecommunications industry. Thanks to our modular scalability, we are designed for future-oriented use and offer customized solutions for your needs. The PreHCM portal combines a wide range of modules such as KDS, WhiteSpot, Operator Agreements, RMR Co-ordination and GSM-R under one roof.

KDS module - co-user platform for complex roof locations
WhiteSpot - coordination platform for supplying WhiteSpots/GreySpots
Operator Agreements - operator agreements (mobile radio) nationally and internationally
RMR Co-ordination - Coordination platform for the supply of railroad lines
GSM-R - Platform for railway and mobile network operator fault management

Our portal development services for you:

- Process modeling and standardization with all parties involved
- Process automation and workflow
- Process integration and connection to user tools (Open API)
- Module development according to modern standards
- Additional services (reporting, monitoring, operation)

Quality gains through automation

Automated interfaces are used to provide neutral reporting and shorten throughput times. The process progress (status model) can thus be seamlessly integrated into the planning process of those involved.
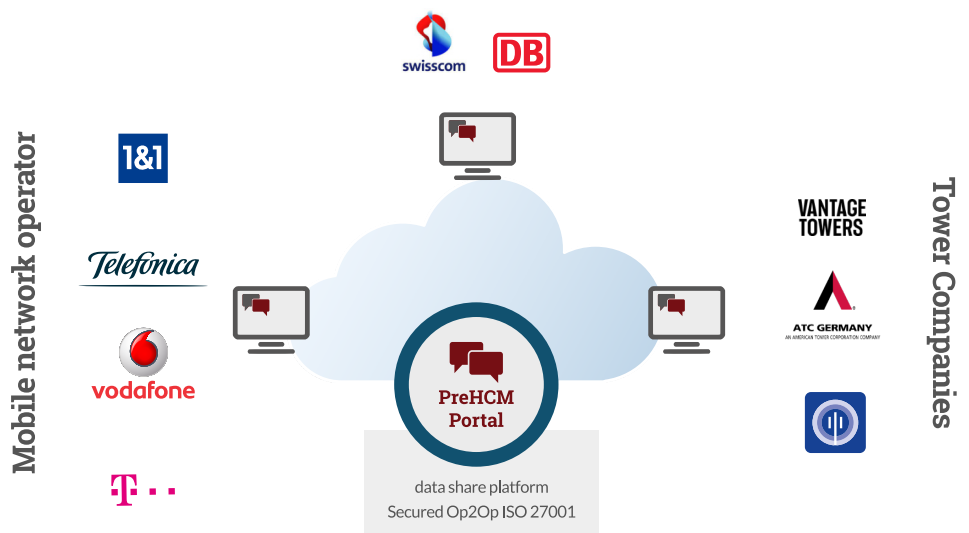

State of the Art - Security

Security requirements according to ISO 27001 coordinated with all users and compliant with their requirements
